

NATO C2COE

C2 DEMONSTRATOR PROJECT BRIEF

Catalysing the Art of C2

The NATO C2COE

MISSION STATEMENT 2015:

‘The NATO C2COE support NATO, nations and international institutions/ organisations with subject matter expertise on Command and Control (C2)’

VISION 2019:

‘NATO C2COE catalyses C2 by capturing, creating, assessing and distributing C2 knowledge. The joint and multinational capacity of NATO C2COE and its partners will lead to robust and applicable knowledge.’

This briefing is a product of the NATO Command and Control Centre of Excellence (C2COE).

It does not necessarily represent the opinions or policies of NATO and is designed to provide an independent opinion.

This briefing is related to a specific event and therefore not releasable using open sources!

Agenda

- Future of the Command Post – study by NATO C2COE
- Technological Enablers
- SACT - Desired C2 End-state 2030
- C2 Superiority
- Multi-Domain-Operations C2 Demonstrator

Future of Command Post

Exponential Technology

1 The accelerating pace of change ...

2 ... and exponential growth in computing power ...

Computer technology, shown here climbing dramatically by powers of 10, is now progressing more each hour than it did in its entire first 90 years

COMPUTER RANKINGS

By calculations per second per \$1,000

Analytical engine
Never fully built, Charles Babbage's invention was designed to solve computational and logical problems

Colossus
The electronic computer, with 1,500 vacuum tubes, helped the British crack German codes during WW II

UNIVAC I
The first commercially marketed computer, used to tabulate the U.S. Census, occupied 943 cu. ft.

Hollerith Tabulator

IBM Tabulator

National Ellis 3000

Zuse 2

Zuse 3

IBM SSEC

EDVAC

Datamatic 1000

IBM 1620

DEC PDP-10

Whirlwind

DEC PDP-4

IBM 1130

Data General Nova

Intellec-8

Compag Deskpro 386

Pentium PC

Pentium II PC

Mac Pro

Dell Dimension 8400

Nvidia Tesla GPU & PC

3 ... will lead to the Singularity

Apple II
At a price of \$1,298, the compact machine was one of the first massively popular personal computers

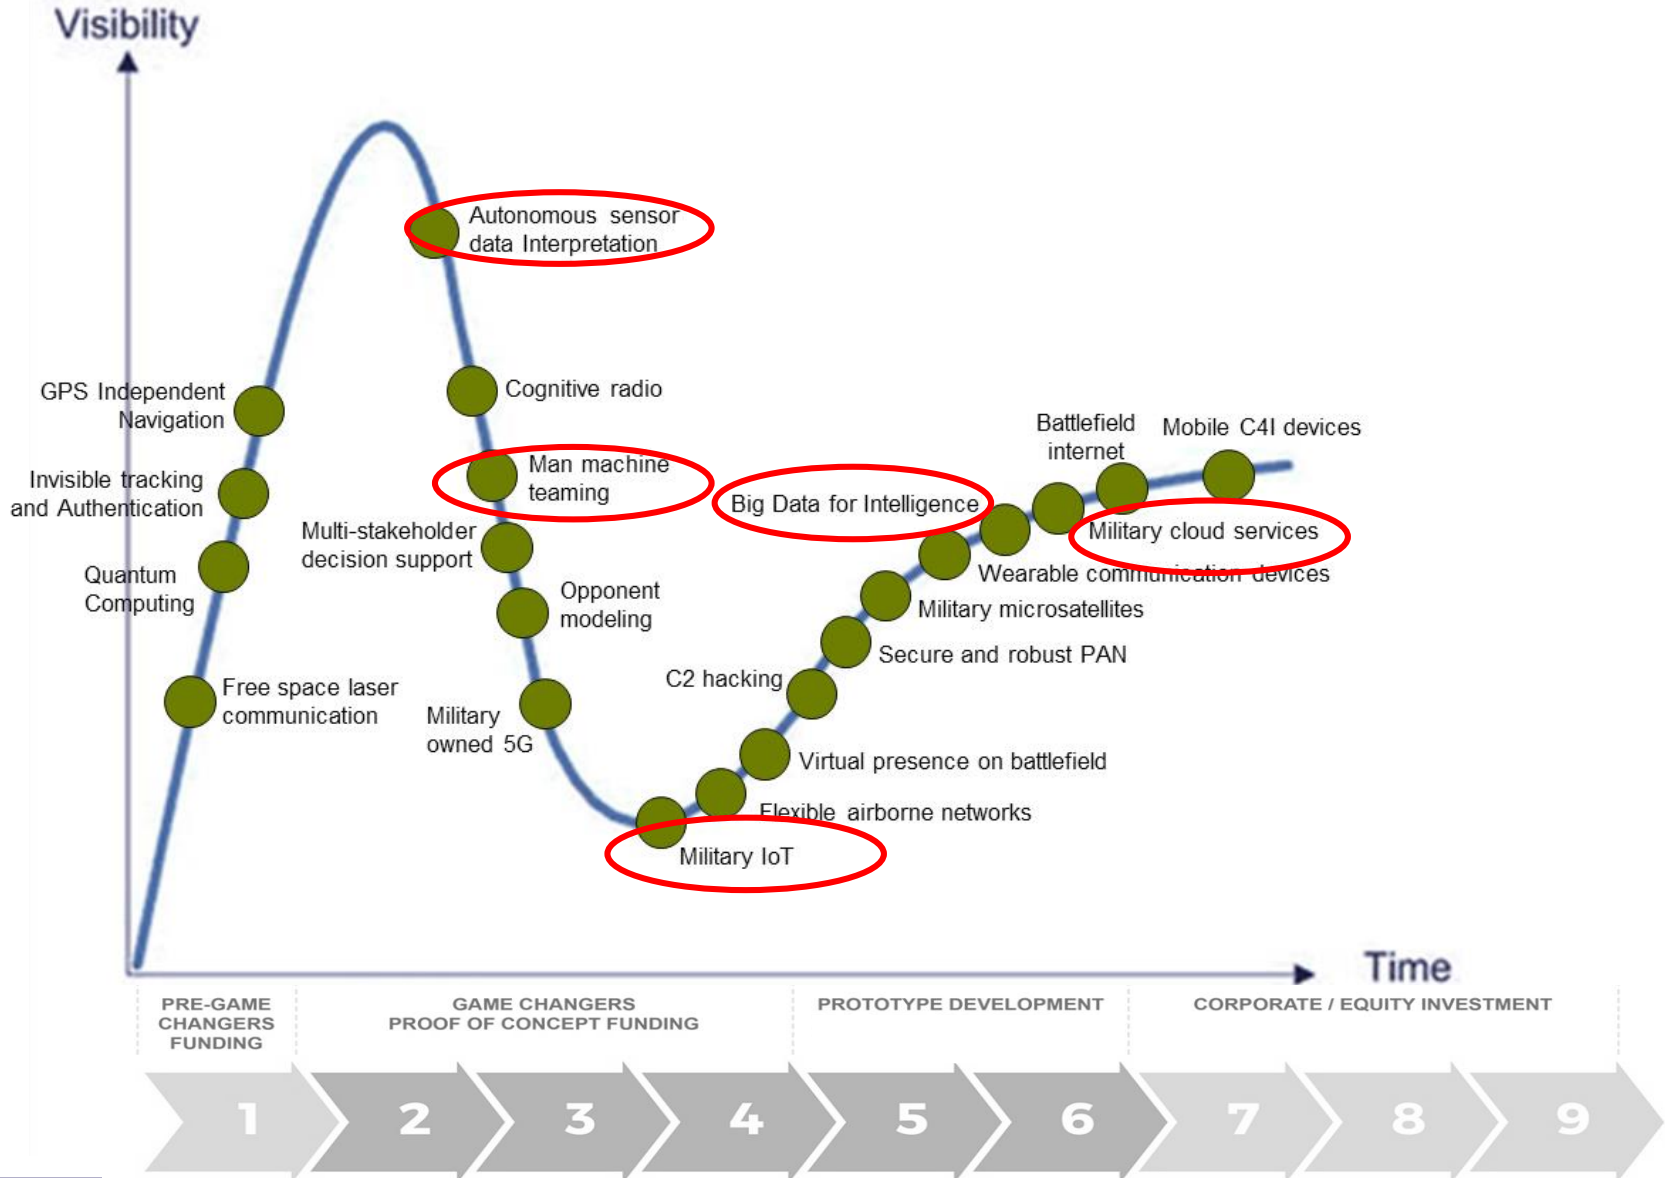

Power Mac G4
The first personal computer to deliver more than 1 billion floating-point operations per second

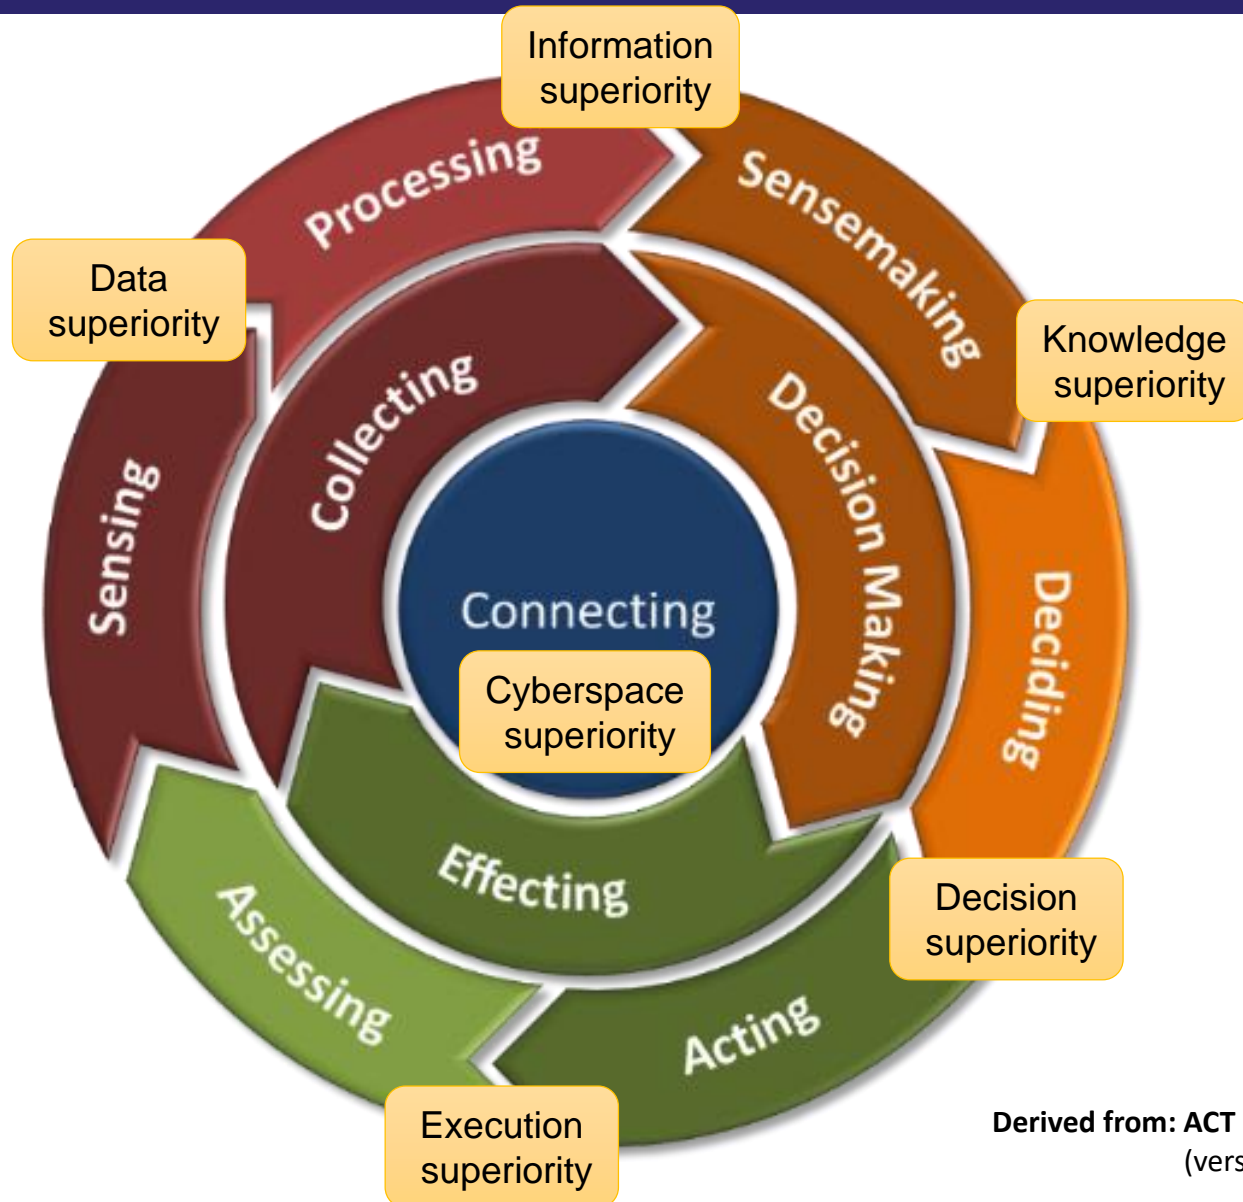

Source: Time magazine, Kurzweil's graph (derived from 'The singularity is near', Ray Kurzweil, 2005)

Innovations related to C2 Plot on the Gartner hype cycle

C2-superiority

MARCH 2019

C2 DEMONSTRATOR

A project by NATO C2COE

NOW:
Phase - 1
Feasibility
Study

AIM OF THE PROJECT:

What do we want to achieve?

Apply knowledge & state-of-the-art technology to design a modular demonstrator to show how the Commander's C2 capacity, efficiency and his DMP can be enhanced in order to rise decision makers' awareness about the technological possibilities from the civilian corporations world to support the decision making process.
The project will facilitate further development of distributed and disperse HQs, information visualization and the implementation of augmented systems into the DMP.

Aim and End State

Aim of the project

Enable:

- Applied Knowledge & state-of-the-art Technology
- Innovations in commander's C2-capacity/efficiency & process

Facilitate in:

- Concept Development & Evaluation
- Experiment in distributed and disperse HQs
- Use of augmented systems into the DMP

End state

Leadership and staff can experience:

- The technological possibilities to improve the DMP
- Work a with modular built systems and technologies
- Working in a future distributed and dispersed HQ

MDO C2 Demonstrator - Triggers

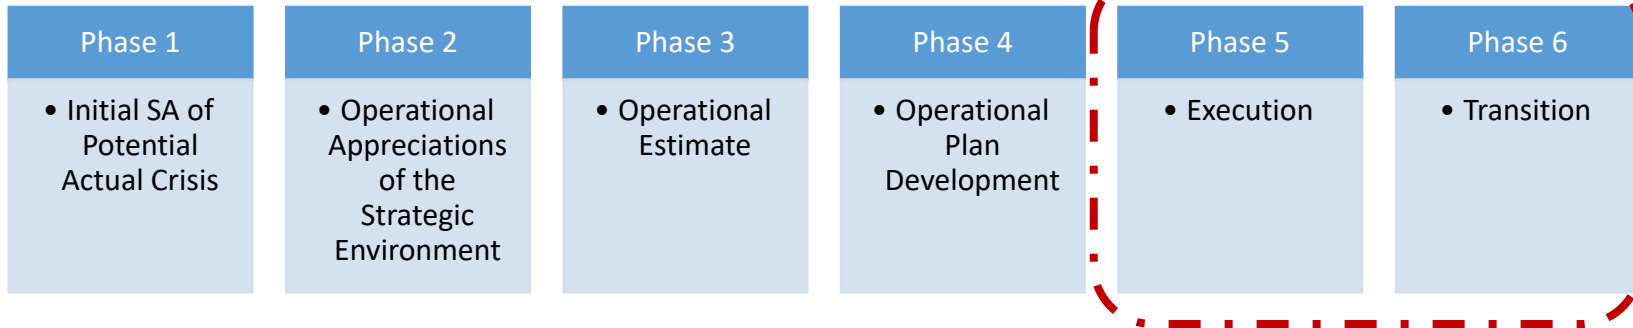

- NATO conference 2018 Dec
- Not using State-of-art-Technology in military HQ
- No dedicated overall C2-tool @ Operational Level
- Time used and quality products need to improve
- Vulnerability of HQ

NATO Crisis Response Planning

- NATO and ACT:
 - Awareness of urgency
 - Insight in Potential solution using new technology
 - Reference on the way-ahead
- EU & National MoD's:
 - Connect High Tactical to Operational Level
 - Connect CIV & MIL missions, FRONTEX-structures
- NATO C2COE:
 - Action Research - Future studies
 - Applied knowledge,

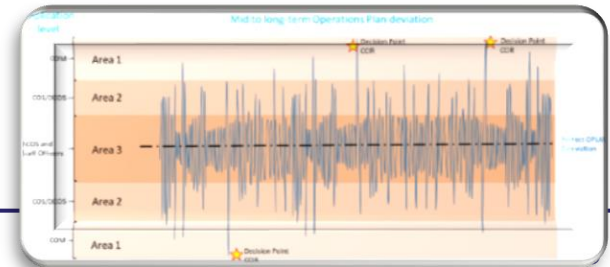

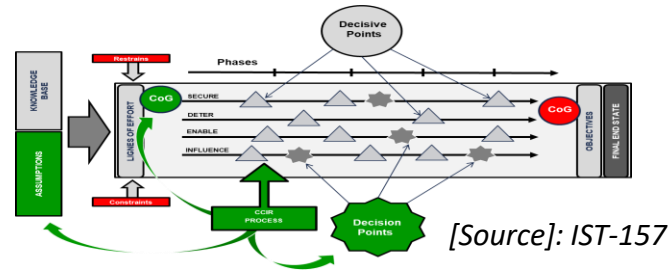

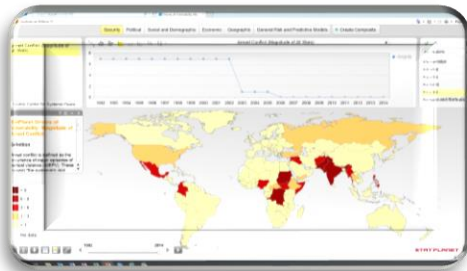

WHAT – Minimum Viable Product

Joint Coordination Board

- C2 Demonstrator : CCIR Focus
- Comprehensive Commander Environment
- COA and/or Decision support

- Exercise Products
 - Compare outcomes and process
 - Recognizable for Leadership
- High-fidelity data sets

- Focus on Commander Concern
 - CCIR driven
 - Human Aspect
- Multi Domain Operations
 - Joint Functions

MDO C2 Demonstrator – System

Modular and
interoperable by design

Node-based network

Demonstrator – show
potential

WHEN- Timeline

C2-Demonstrator

Projectplan June 2019 v0R1

Markering van periode:

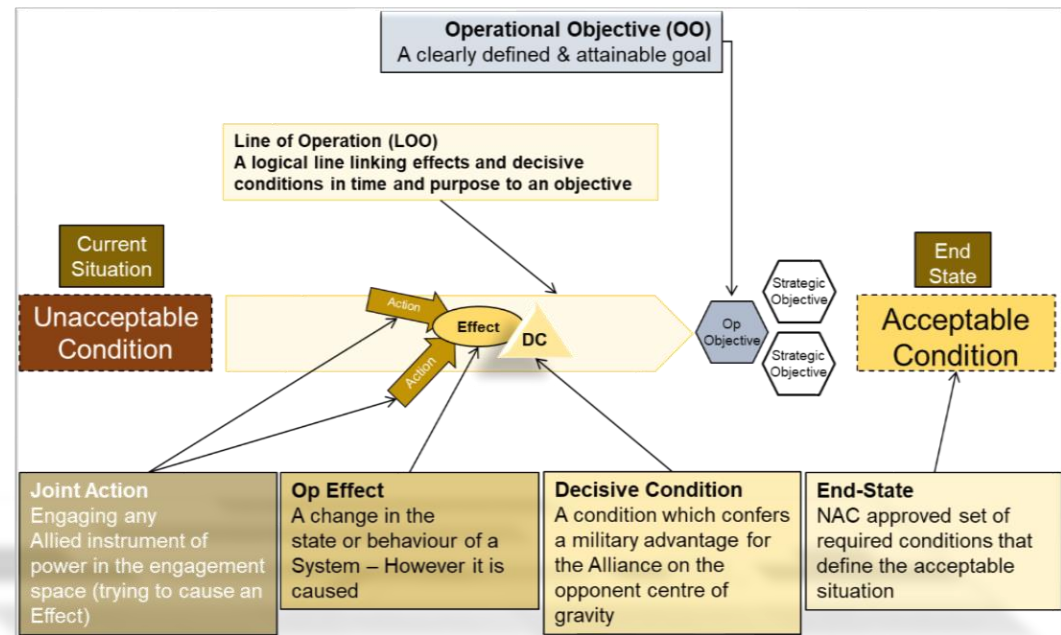

Project-management

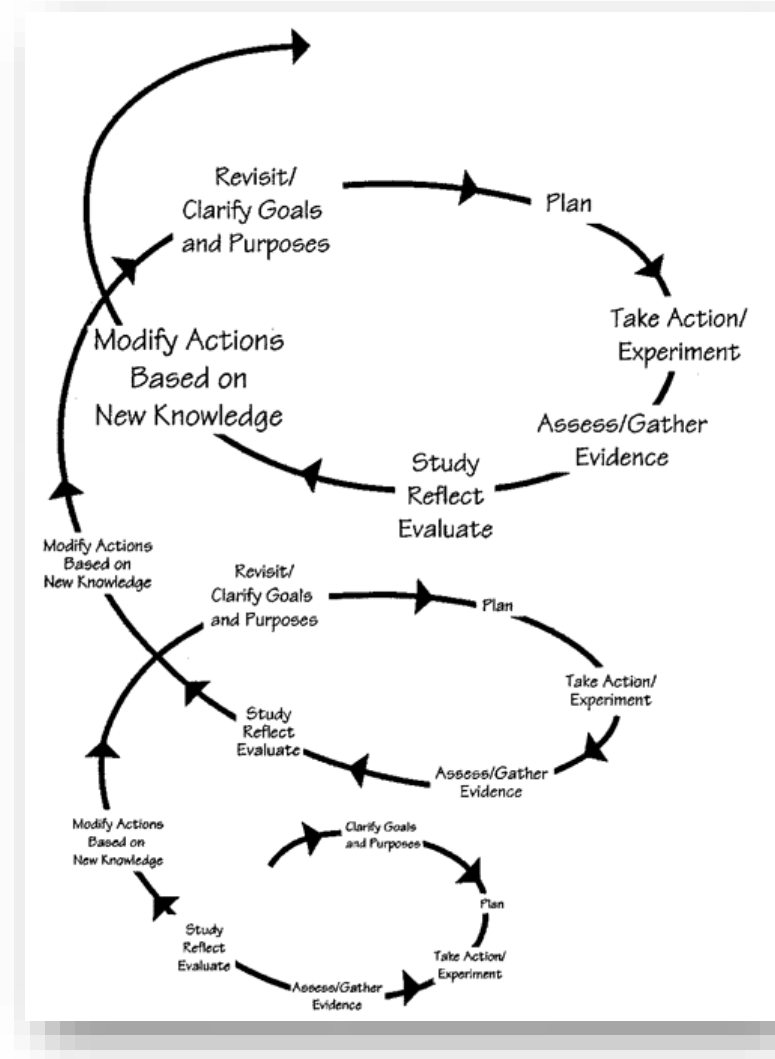

- Agile – not cascading
- Define End states– not specifications
- Minimal Viable Product (MVP)
- Open Platform Innovation
- System-of-systems
- Fit-For-Purpose

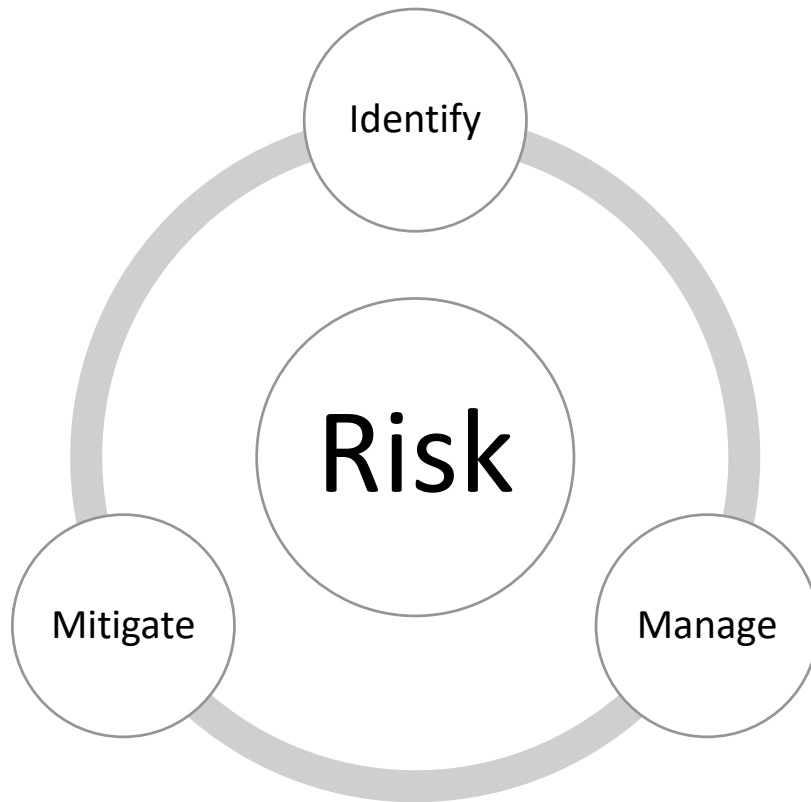

Conditions for Success

- Teaming of NATO C2COE & Partners
- Recognizable for Commander & Staff
- Establish Trust
- Ease-of-use
- Responsive/Timely/Accurate

HOW

RISKS TO MITIGATE

- Paralysis by analysis
- Trust -Transparency of AI-DMP
- Data matters: garbage in is garbage out.
- Available capacity (skills, time)

Potential Partners

You
?

MDO C2 demonstrator Take away

NATO C2COE has the ambition to:

1. Demonstrate a Multi-Domain-Operations C2 MVP in 2020
2. Apply C2- knowledge in a distributed and dispersed HQ
3. Use modular designed technology as an enabler for C2-enhancement
4. Increase the Commander's C2- efficiency in Decision-Making-Process
5. Speed up Technology adaptation and acceptance of AI-based authority

What do we offer in this project

1. Bridging the gap in C2 between:
 - Technology and operators
 - Tactical and operational level
 - Academics and Applied knowledge
2. A concept test & evaluation platform
3. Link to CoI including policy makers and operators.
4. Workshop 16th of September with potential partners
