**Subject:** **NATO C2COE Annual Conference 2024**  
**'NATO MDO Synchronisation – C2 Implications': How to achieve converging effects in the continuum of competition?**

Every year, the NATO Command and Control Centre of Excellence (NATO C2COE), in close collaboration with the Canadian Joint Warfare Centre, organises a conference on a particular aspect of Command & Control (C2).

The 2024 edition will take place from the **19-21 November** at the **Majoor Jan Linzel Complex (MJLC) – The Hague, The Netherlands**, around the theme 'NATO MDO Synchronisation – C2 implications': How to achieve converging effects in the continuum of competition?'

NATO is transforming into a Multi-Domain Operations (MDO) enabled Alliance. An important element of NATO's MDO concept is the synchronisation with non-military actions within other Instruments of Power and other non-military actors, like industry, to create converging effects in all dimensions.

A key question will be, "What are the C2 implications?"

The conference will be a forum where experts can offer their perspectives and opinions, engaging with a diverse audience to discuss the opportunities and related obstacles of executing this synchronisation between all partners involved.

When you consider yourself an expert or want to gain a better understanding of NATO's command and control, please join us.

If you have any questions or would like to contribute in any way, please feel free to contact LTC Dr. Joris Wijnker (OPR) or Mr. Jos Hekking (DOPR), who are the designated points of contact for this event. Your contribution, prepared in close cooperation with our conference team, can take the form of a speech, presentation, panel discussion or demonstration, and will be highly appreciated.

We are looking forward to meeting you during the conference, and we will send out the invitation with further details concerning registration and the agenda in the following weeks.

Sincerely,
